

Greetings!
I'm **Sally Tinker**,
the world's foremost inventor
under the age of
twelve.

I've got
the trophy and
everything.

That
is my brother,
Joe.

I never asked
for a brother,
but if I had ...

JOE

'How NOT to Design a Brother'
diagram by S. Tinker Inc.
(Definitely not patent-pending)

Top-heavy
(i.e. big
giant head)

Short
battery life

Selective
hearing;
ignores verbal
commands

No volume
control

Hands
(sticky)

Shirt
(dirty)

Weak support
struts,
insufficient
gyroscopic
calibration

<<DANGER>>

Toxic waste leaks
from chassis;
waste collection
receptacles have
proved ineffective
so far

... I would have
asked for a
better one.

As you can see,
Joe has COUNTLESS
design faults ...

... but there are three problems that are
particularly serious:

1. He's always making a mess.

2. He's always breaking my machines.

3. He's always sticky, smelly and wet.

Worst of all,
Joe is impossible to control.

In short: my brother is defective.
So, naturally, I did what anyone
would do ...

I built a new one.

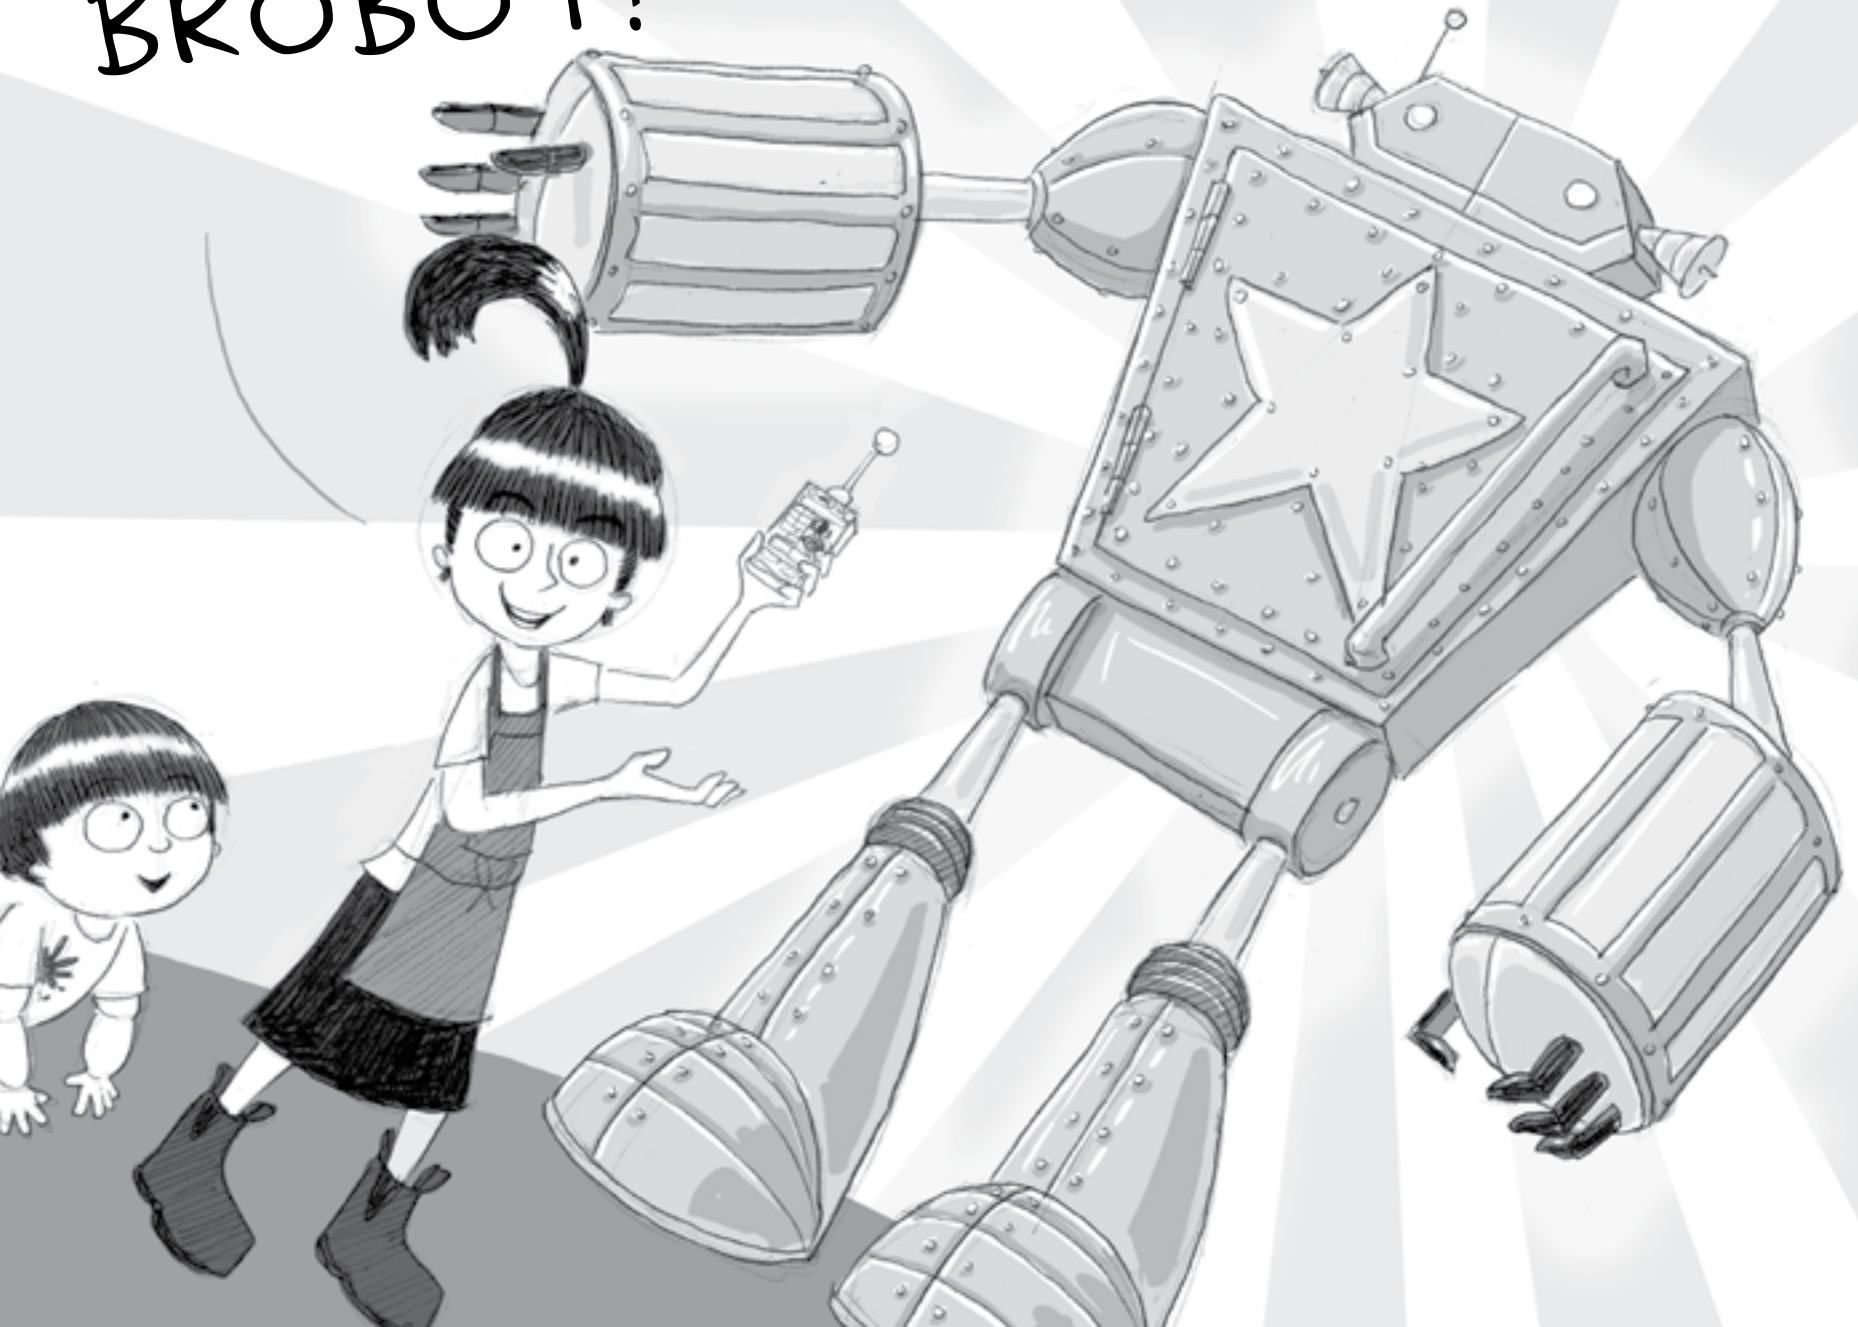

BEHOLD!
My amazing,
patent-pending ...

STOMP
STOMP
STOMP

BROBOT!

BROBOT

'Just as a Brother Should Be'

An S. Tinker  Inc.
invention

©® Trademark/Patent
Pending Worldwide

Forearm
tool compartments
(with the latest Teenyweenytech
matter-compression technology)

Brobot is
PACKED with
great features ...

Aerial
(receives commands
from Brobo-remote)

Optical scanners
(10 gigapixel,
200x zoom,
dreamy shade of blue)

CPU &
brotherboard

Solar-powered
hybrid
supercapacitor
(i.e. big battery)

Audio receivers/
gyroscopic
stabilisers
(attached via
wingnuts)

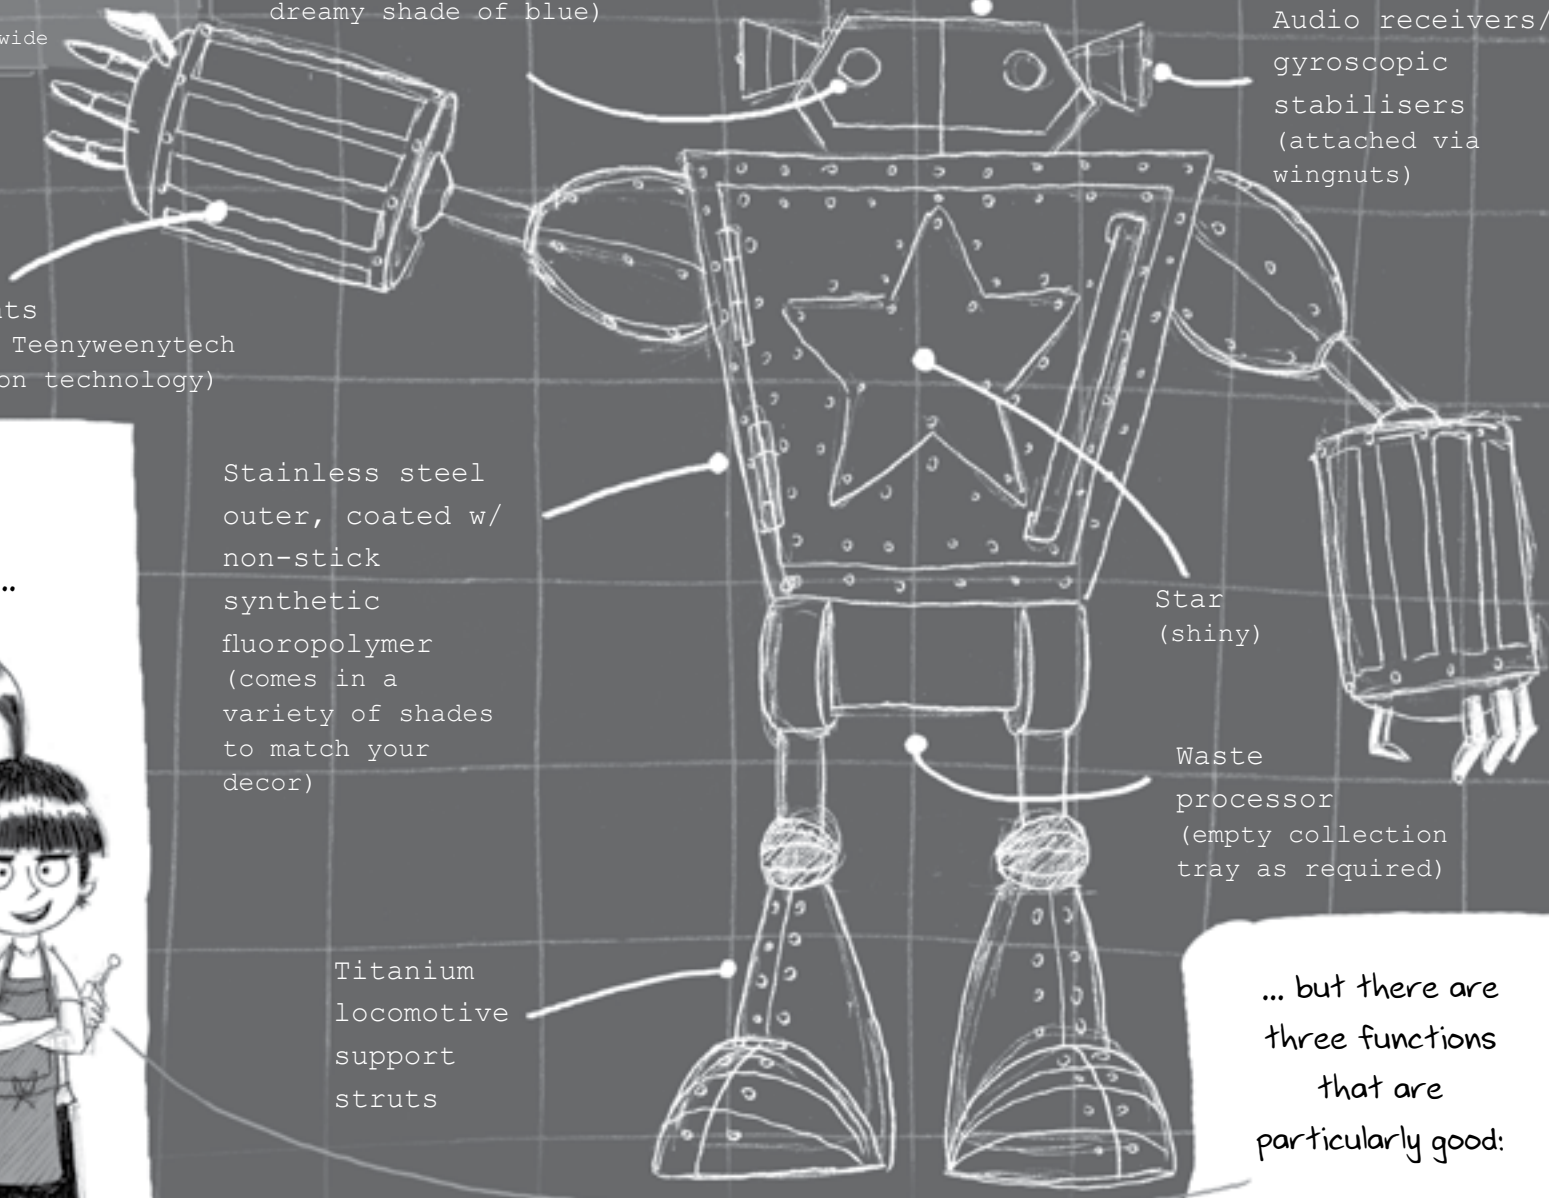

Stainless steel
outer, coated w/
non-stick
synthetic
fluoropolymer
(comes in a
variety of shades
to match your
decor)

Star
(shiny)

Waste
processor
(empty collection
tray as required)

Titanium
locomotive
support
struts

... but there are
three functions
that are
particularly good:

1. He can clean up
messes.

2. He can
fix broken
machines.

3. He's made of non-stick,
leak-proof
stainless steel —
so he's never, ever
sticky, smelly
or wet.

In short:
Brobot is just
as a brother should be.
