

*Antarctica is the coldest, windiest,*

*driest continent in the world.*

*It is an icy desert, with mountain ranges  
and sleeping volcanoes buried deep.*

*But it is also home to animals amazing and unique.  
How many can you find?*

*One freckled, speckled leopard seal*

*sailing on an icy-blue berg.*

*Two courtly, portly emperor penguins  
waddling across the polar plains.*

Three lumbbersome, cumbbersome

elephant seals lining the sandy shore.

Four slow-paced, big-faced right whales

wallowing in rippling reflections.
